## D30 INTELLIGENT SHOCK ABSORPTION™

“d30™ intelligent shock absorption™” developed in Snow-sports and Military industry is first applied to motorcycle boots by Falco. “d30™ intelligent molecules™” flow freely when moving slowly but on shock lock together in net to absorb impact energy. Transmitted force to ankle-foot area is significantly reduced thanks to d30™ exclusive support.

Il polimero intelligente d30™ sviluppato nell'industria militare e degli sport invernali è ora applicato in esclusiva sui migliori prodotti Falco. Le molecole d30™ si legano in caso di urto favorendo l'assorbimento dell'energia di impatto. La forza negativa trasmessa alla caviglia viene ridotta in maniera significativa.

Falco pour premier s'impose dans la fabrication de bottes moto en utilisant en exclusivité le polymère intelligent d30™, développé et utilisé dans les sports d'hiver et l'industrie militaire. Il se compose par des molécules intelligentes qui absorbent l'énergie de l'impact. Son support au niveau des malléoles réduit significativement toute pression négative.
